

# Cable Avoidance Tool

Course code	CAT&GENNY
Duration	1/2 Day
Location	Customer's own site

## Who should attend

Delegates whose duties require them to operate a Cable Avoidance Tool and Generator.

## Objectives

On completion of the course delegates will be able to:

- Undertake inspection of a Cable Avoidance Tool and Generator.
- Demonstrate the safe and accurate use of the tool.
- Demonstrate the actions required when finding a buried service.
- State how to deal with defective equipment.

## Content

- Overview of Health & Safety Regulations.
- Introduction to utility plans.
- Cable Avoidance Tool and Generator operation.
- Practical training using the Cable Avoidance Tool.
- Theory/Practical Assessment.

## Learning approach

Classroom session with demonstrations and practical exercises. Individual practical and theory based assessments taken on completion of course.

A practical area such as a car park is needed for the practical demonstration and assessment.

## Features

Delegates will be issued with a certificate of achievement once successfully completing the course.

## Additional Information

Delegates will need to wear full PPE in accordance with Network Rail standards. Please ensure this is provided when enrolling on the course.
