

C&G 2382-15 17th Edition of IEE Wiring Regulations BS7671 incorporating Amendment No. 3 – (Yellow Cover)

Course code I7ED-2382-15

Duration

4 or 5 days

Location Customer's own site

There are no formal entry requirements for this course. As a general rule candidates should have knowledge of electrical installation and electrical science. The course is primarily aimed at practising electricians and domestic installers; however it is also very popular with allied professionals such as contracts managers, designers, electrical engineers, consultants, surveyors, and other related trades needing to update and enhance their understanding of the IEE Wiring Regulations.

Why take this course?

Every electrician and domestic installer needs to stay up to date with the latest 17th Edition wiring regulations. As such this is possibly the most popular course we offer. Anyone looking to register with a competent person's scheme will need to prove they are up to date even if they have already completed a Level 3 NVQ.

17th Edition Course Content:

This is a classroom based course. It is designed to bring you up to speed with the latest 17th Edition wiring regulations including the 3rd Amendment from January 2015. You will learn all the key regulations that you will find in day to day installations, as well as understand how to reference your Regs book for the more obscure ones. The course then culminates in an open book multiple choice exam which allows 2 minutes to answer each question. This means you can take your copy of the BS7671 book into the exam and refer to it as and when required.

There are 8 sections that make up the 17th Edition course relating:

Part 1 – Scope, object and fundamental principles
Part 3 – Assessment of general characteristics
Part 5 – Selection and erection of equipment
Part 7 – Special installations or locations

Part 2 – Definitions
Part 4 – Protection for safety
Part 6 – Inspection and testing
Appendices
